DETAILED ACTION

1. This action is in response to applicant's amendment received on 2/17/04.

Specification

2. The amendment filed 2/17/04 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: pivot pin connections 17 and 19 (see Fig. 1-3 and 5-7).

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 8-11, 13-18, 20-23 and 25-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Huang. '639.

Huang discloses (Fig. 1-4) the invention including a cutting device, a plate portion 10 having top side, left and right sides and a slot 15, a transverse slit 12, a cutting blade 21, first and second legs 40, a connector (20, 26 and 30-32) having a pin, a shield portion 11, a cutting

chamber 17, first and second legs are in an open position said cutting blade is in a retracted condition (see Fig. 3), first and second legs are moved into a closed position/fully closed position, said cutting blade move into cutting engagement (see Fig. 4), a centrally located/an outer cutting tip or an outer contact point that is located in axial alignment with said slot, an angled cutting surfaces, a guide (lateral sides of the member 20), first and second legs extension 30 and 31 are movable from a first retracted position (Fig. 4) to a second extended position (Fig. 3), locking means/ a key ring opening/a latch (Fig. 1) and an enclosed end .

Allowable Subject Matter

5. Claims 7 and 12 are allowed.
6. Claims 19 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Huang does not disclose "a connector including a pin which is received in a slot in a head member". However, Huang teaches a connector 20 including a pin 26 which is received in a slot in a head member and *operatively connects* a first leg (via member 30-32) and cutting blade.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
